

## **Energy Conservation**

All school personnel are urged to participate actively in a program of energy conservation by assisting in a serious effort to eliminate the wasteful use of energy in the operation of the School District's physical plants. Cooperation and some sacrifice will be required of each employee and each student to achieve a meaningful energy conservation program that results in a savings and a more efficient use of energy resources.

### **REGULATIONS:**

1. All appliances and lighting should be turned off when not needed. Particular attention should be directed to areas that may have sufficient natural lighting from windows and skylights.
2. All windows and outside doors should be kept closed when heating or cooling systems are in operation.
3. The energy conservation program is an important factor to be considered in planning effective use of school facilities, new construction, remodeling or rehabilitation programs, and modernization projects.
4. Involvement of all staff members and students is essential to a successful program of energy conservation.
