

### **Gifts to and Solicitations by Staff**

The Board of Education recognizes at times there is value in students earning money through community projects. However, the tax structure for the State of Colorado and for Eagle County has allowed for the purchase of educational necessities. It is, therefore, the position of the Board of Education that teachers shall not solicit school patrons for the purchase of books or other school materials. This policy is not meant to preclude fund raising activities for the purpose of promoting student educational activities (*e.g. field trips, student recreational activities, etc.*).

#### **REGULATIONS:**

1. Any solicitation of the public in any manner by a staff member or school organization must have the approval of the building principal.
2. An accurate financial accounting of all fund raising activities should be made available to the building principal during the fund raising activity and/or at the completion of the activity.
