

### **School Community Relations Goals**

The Board of Education shall interpret the educational program to the people and invite discussions and suggestions on important educational policies, and shall attempt, at all times, to represent the entire community rather than any single group or section. To this end, the Board establishes the following school-community relations goals:

1. To develop intelligent citizen understanding of the School District in all aspects of its operation.
2. To determine how the citizenry feels about the School District and what it wishes the School District to accomplish.
3. To develop citizen understanding of the need for adequate financial support for a sound educational program.
4. To help citizens assume a more direct responsibility for the quality of education the School District provides.
5. To earn the good will, respect, and confidence of the citizenry in the personnel and services of the School District.
6. To bring about citizen understanding of the need for the improvement and what must be done to facilitate essential change.
7. To involve citizens in the work of the Board and solving of its educational problems.
8. To invite the assistance, cooperation, and understanding of elected and appointed officials and committees in the development of educational programs and facilities.
9. To promote a genuine spirit of cooperation between the Board and community in sharing leadership for the improvement of the community.
